WE ARE THE LEADING PUMPS AND FLUID TRANSMISSION COMPANY IN WEST AFRICA
OVAMANN Pumps Limited is a technology-driven Organization that specializes in the sales, distribution, installation, and maintenance of all forms of pumps, electric motors, industrial & domestic plumbing systems and projects.

OVAMANN provides topnotch pumping solutions to her numerous groups of clients through strategic partnership and alliance with world-class pump brands to deliver quality products and unmatched value.

With over 20 years of experience in the sales, distribution, installation, and maintenance of all forms of pumps and fluid transmission projects, locally and Internationally, OVAMANN has championed major pumping projects for various Institutions, Ministries, Individuals, and Organizations across various sectors; Pharmaceuticals, Food, Oil & Gas, Factories, Real Estate & Agriculture; providing lasting solutions to all pumping needs.

OUR MISSION

To solve all pumping needs through effective sales, distribution, installation, and maintenance of quality pumps, electric motors, industrial & domestic plumbing systems and projects in accordance with global standards.

OUR VISION

To champion innovative solutions for all pumping needs.

CORE VALUES

To champion innovative solutions for all pumping needs.

Incorporated in 2001.
Fully Owned Nigerian Company
Sole Representative of MAS DAF, Turkey In Nigeria
Sole Representatives of LEO Pumps in Nigeria
Sole Representative of CNP Pumps
Representatives of Xylem inc. USA
Representatives of Pedrollo Pumps, Italy
Representatives of Fluid Tech, Rotofluid Pumps.

Industries we serve

Oil and Gas

- Product transfer in refineries
- Chemical processing and transfer
- Fire Suppression system
- Process water supply
- Hot Oil transfer
- Corrosives etc.

Aviation and Marine

- Vessel dewatering
- Jetting
- Aviation product transfer
- Fire Hydrant system (fire suppression) etc.

Agriculture

- Irrigation/ pivot system
- Fluid transfer
- Sprinkler systems
- Solar irrigation systems
- Feed transfer etc.

Industrial, Commercial and Domestic

- High lift water supply
- Booster systems
- Fountain
- Borehole
- Solar systems

Mining and Construction

- Open pit and underground drainage
- Slurry tailings and dewatering
- Face and Stage dewatering etc.
- Drill rig water supply
- Site Drainage and well-point dewatering etc

Municipal

- Emergency flood drainage
- Intake
- Lift stations pumping
- Sludge and waste removal etc.

OUR EXPERTISE

In OVAMANN PUMPS LIMITED, we are working with our team of foreign partners/manufacturers in the industry to provide Nigerians and West Africa sub-regions, the best pump related services, rehabilitation/construction and supply of the most efficient and reliable oil pumps/ water engineering services at the most affordable cost in Africa.

With constantly improving technologies around the world, OVAMANN PUMPS LIMITED will continue to press towards providing higher efficiency pump products and services for both industrial and commercial applications which a relatively cost effective.

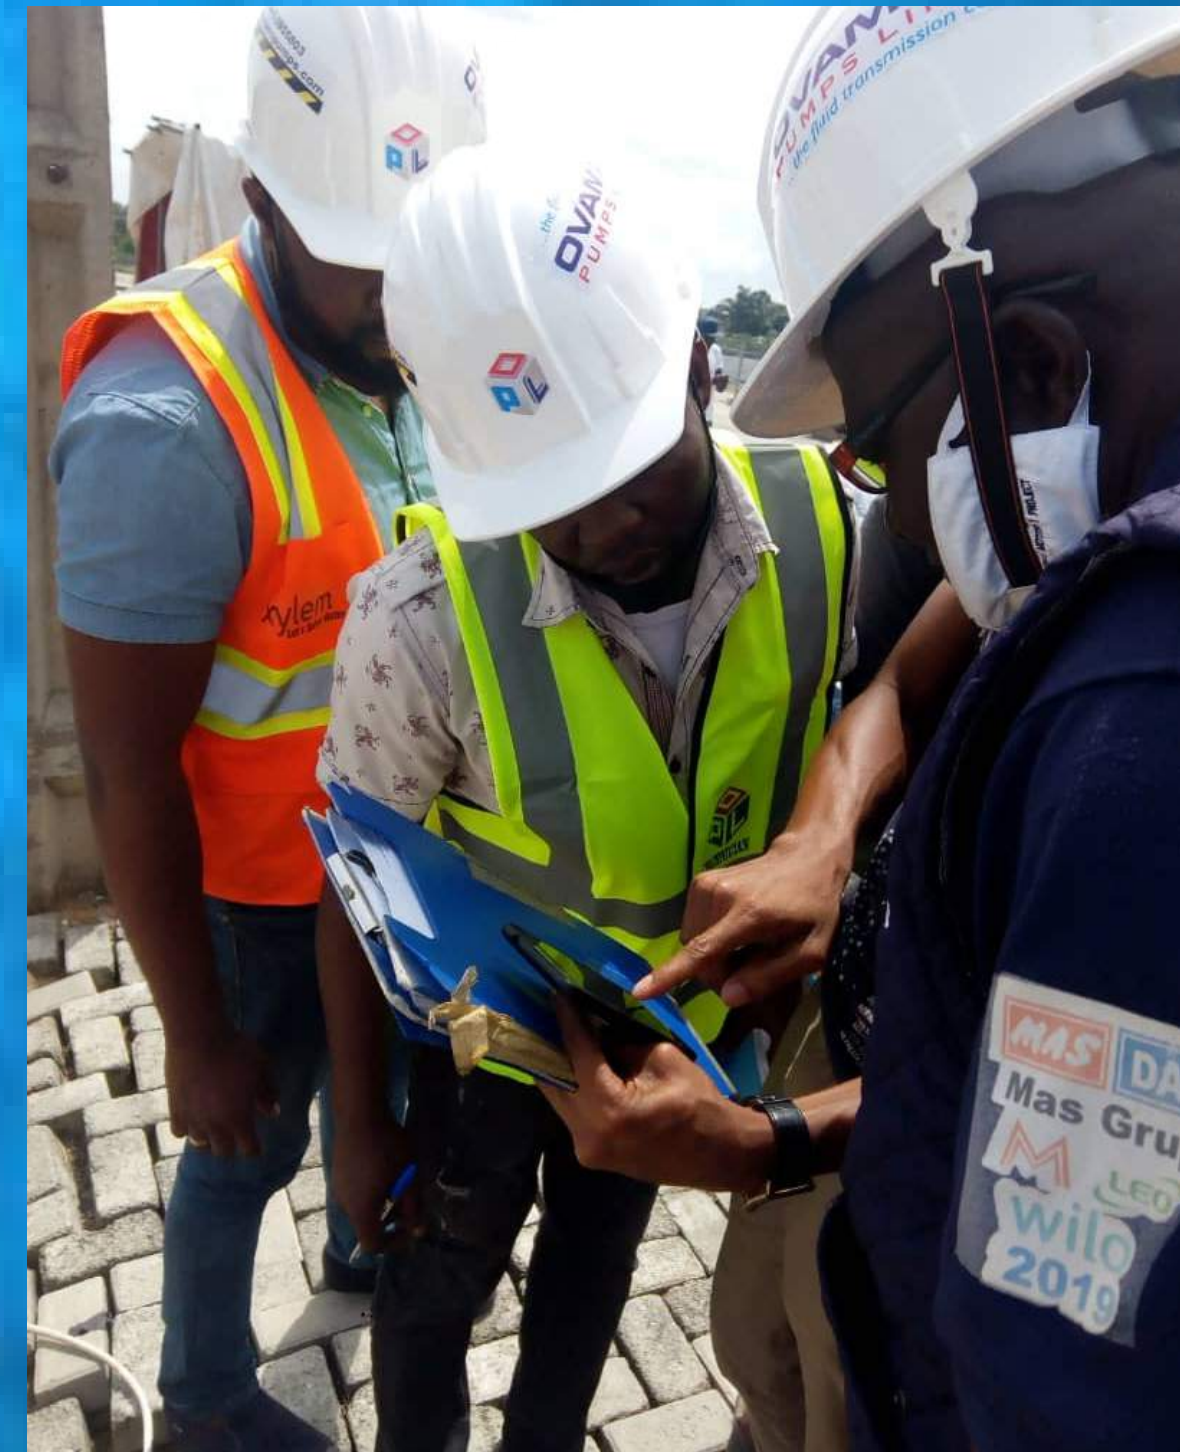

In Nigeria, we are indisputably the number one company in sales, installation services and services of all types of industrial and domestic pumping machines for all kinds of fluid transmission. We also stand as the best in Municipal water projects, water concession schemes and general water engineering services delving into our wealth of experience in the field. Our completed and ongoing projects across Nigeria speaks volume of our qualifications.

We are aware that speed, efficiency, reliability and affordability are the major concerns that our clients look out for, so we go the extra mile to provide at all times pumps and services that satisfy those as part of our brand promise.

OVAMANN PUMPS LIMITED over the years has been a facilitator of progress across the country thereby being a critical enabler for productivity and sustainable economic growth. OVAMANN PUMPS LIMITED has a history of remarkable infrastructural project in Nigeria starting with Kaduna State water project. Today, water projects, road networks, dams and embankments across the nation are a demonstration of our commitment to providing sustainable value solutions for Nigeria's largest infrastructural development.

We continue to play a major role to developing communities in Northern region of Nigeria ravaged by a lack of basic rural amenities, especially engaging in projects that will clean and constant water supply with contributions to the rehabilitation, expansion and new construction of essential infrastructure throughout the country.

PUMPS MOTORS
PROJECTS

**REHABILITATION
OF
IJU & ADIYAN WATER WORKS,
LAGOS STATE.**
CLIENT: Lagos Water Corporation

SCHEME,
KADUNA STATE.**

PUMPS MOTORS
PROJECTS

OVAMANN PUMPS LIMITED has successfully carried out rehabilitation projects in Kano and Kastina states to mention but a few, also projects for private organisation in both rural and urban locations across the federation.

SHOWROOMS & OFFICES

LAGOS

Head Office

- OVAMANN HOUSE, 1 Shalom Street, Off apple Junction, Ago Palace Link Road Amuwo Odofin, Lagos,
- OVAMANN HOUSE, Owooniran Street, Off Access Bank, Coker Market, Lagos.

ABUJA

- Ahmadu Bellow Way, Mabushi (Same Premises with Emadeb Filling Station), Abuja.

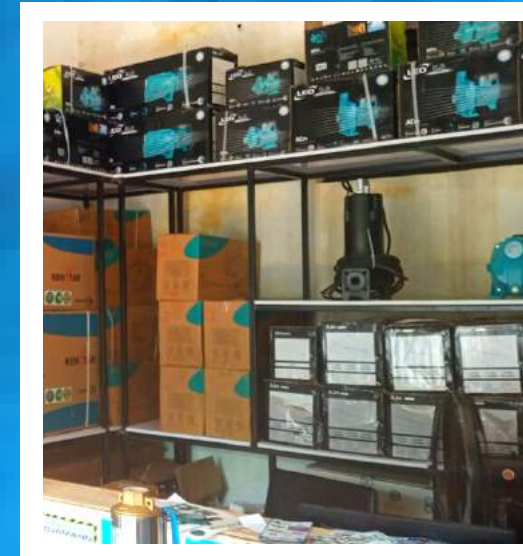

SHOWROOMS & OFFICES

Enugu

● Shop 9, Garden plaza, Garden Avenue, Enugu.

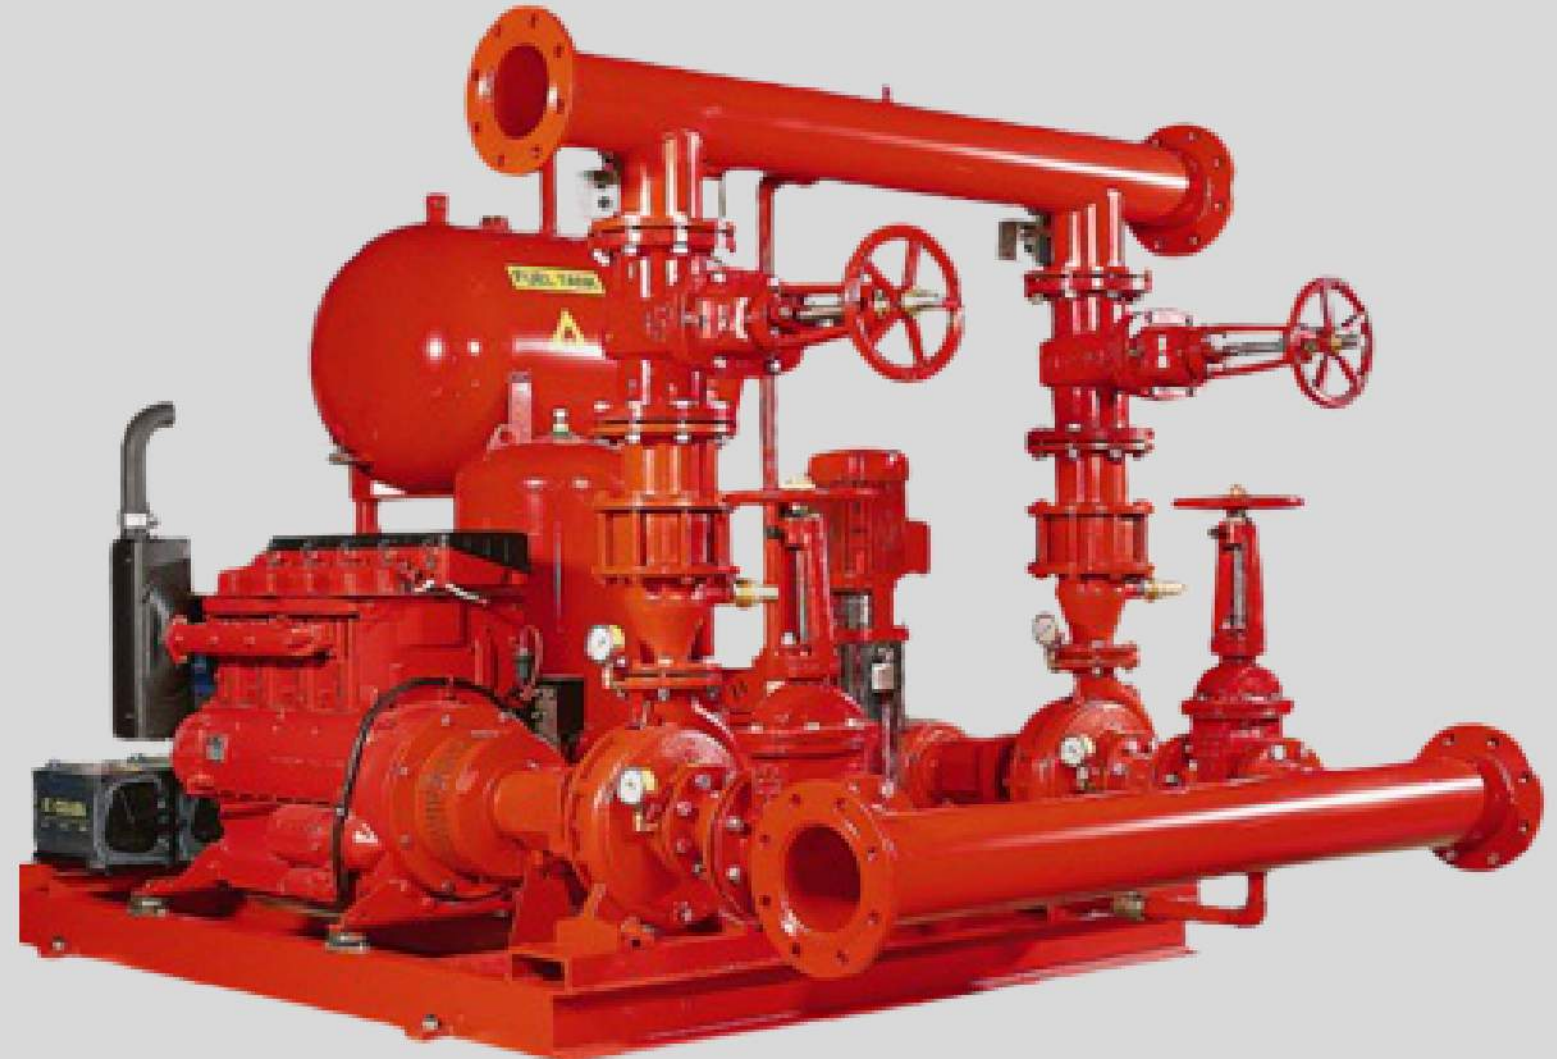

Dei-Dei-Abuja

● Shop A2-154 international building materials market, Dei Dei Abuja

As partners with Masdaf turkey, we listen to your pump needs. In relations with our partners experience of more than 45 years, we attach importance to your priorities. From energy efficiency to hygiene, from advanced infrastructure to savings, we offer the most suitable applications to solve your needs in many different subjects for all kinds of industrial applications.

AS DAF produces centrifugal pumps to be used in many fields such as industrial processes, irrigation systems, heating and cooling systems, marine industry, waste water transfer, fire extinguishing processes, petro-chemical industry, agricultural irrigation, etc.

MAS DAF

PRODUCTS

xylem

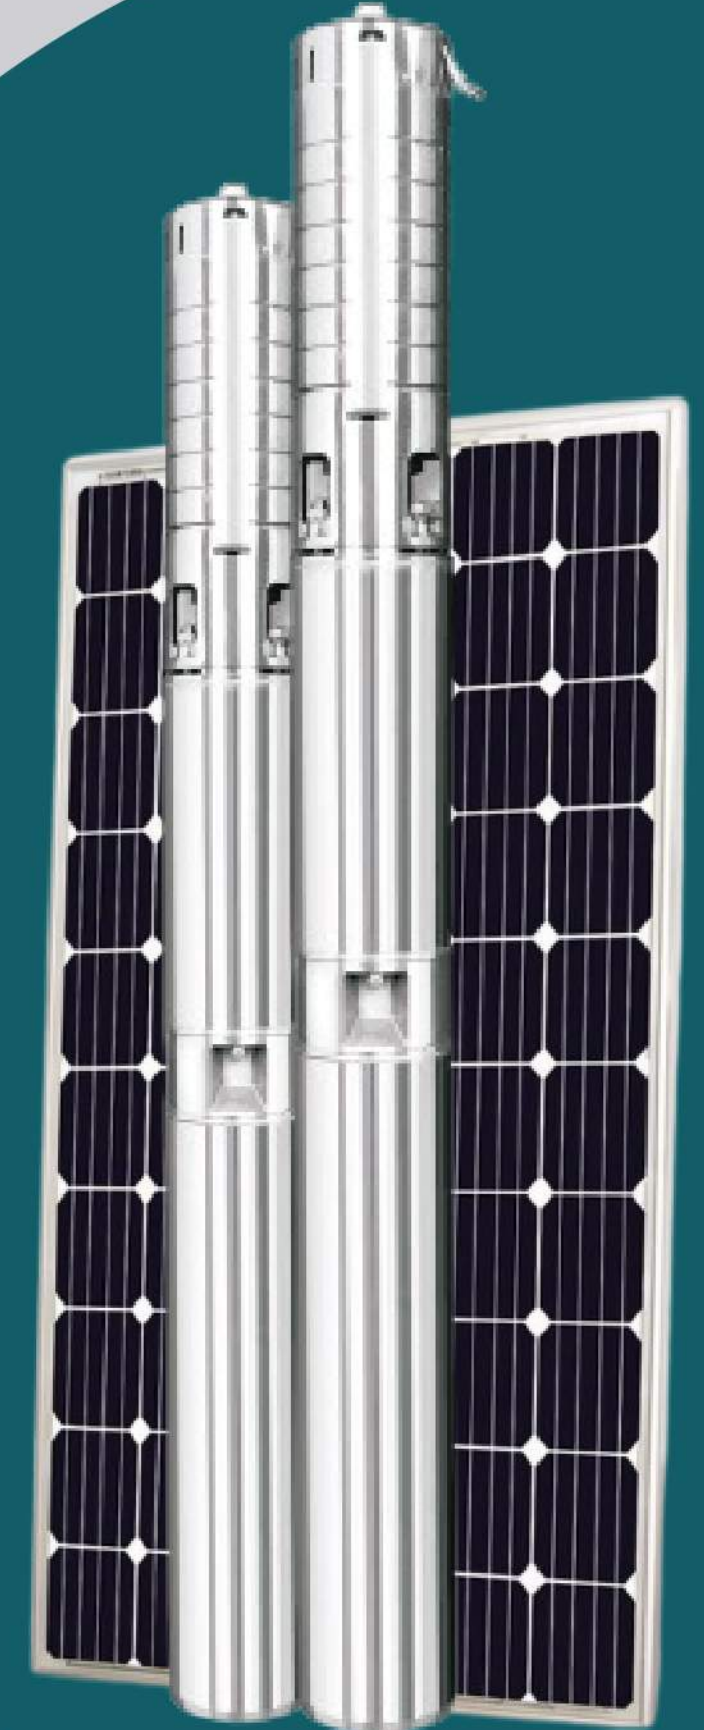

Let's Solve Water

Ovamman pumps Ltd in partnership with Xylem inc, the world's no.1 pump manufacturers of new generation dewatering pumps for toughest situations engineered for efficient, reliable and less stress in pumping over a long period of time. Xylem inc. has Godwin pumps to transport raw sewage sludges; flyght pumps, robust and reliable submersible dewatering pumps with dedicated superstructures. Xylem is also the brand owner of Lowara pumps, Goulds pumps etc.

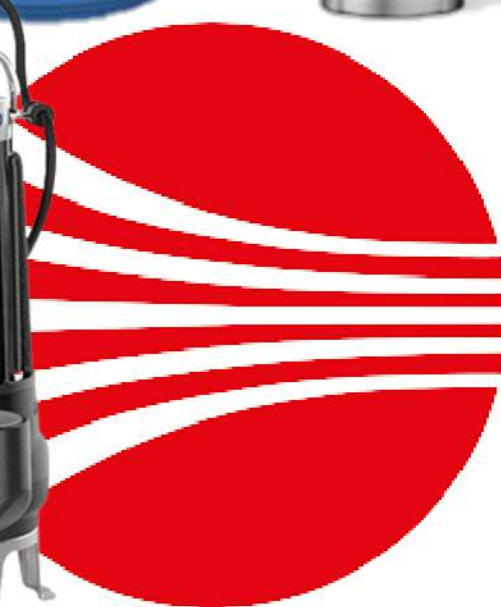

With Devotion to providing sustainable development,
LEO Group in partnership with Ovamann pumps limited (sole distributor in Nigeria) has been developing and supplying the perfect and complete pumping machines for industrial, commercial and domestic systems meeting the market's demand effectively.

Pedrollo is a large, constantly growing company that extends over an area suited to a volume of production that has reached 2 million pumps a year. Pedrollo's entire production complies with the highest quality standards, an element that distinguishes outstanding Italian companies. This result is made possible not only by the technology of machines and plants but above all by the extraordinary professionalism and competence found at every level of production and management, integrated in a continuing training process.

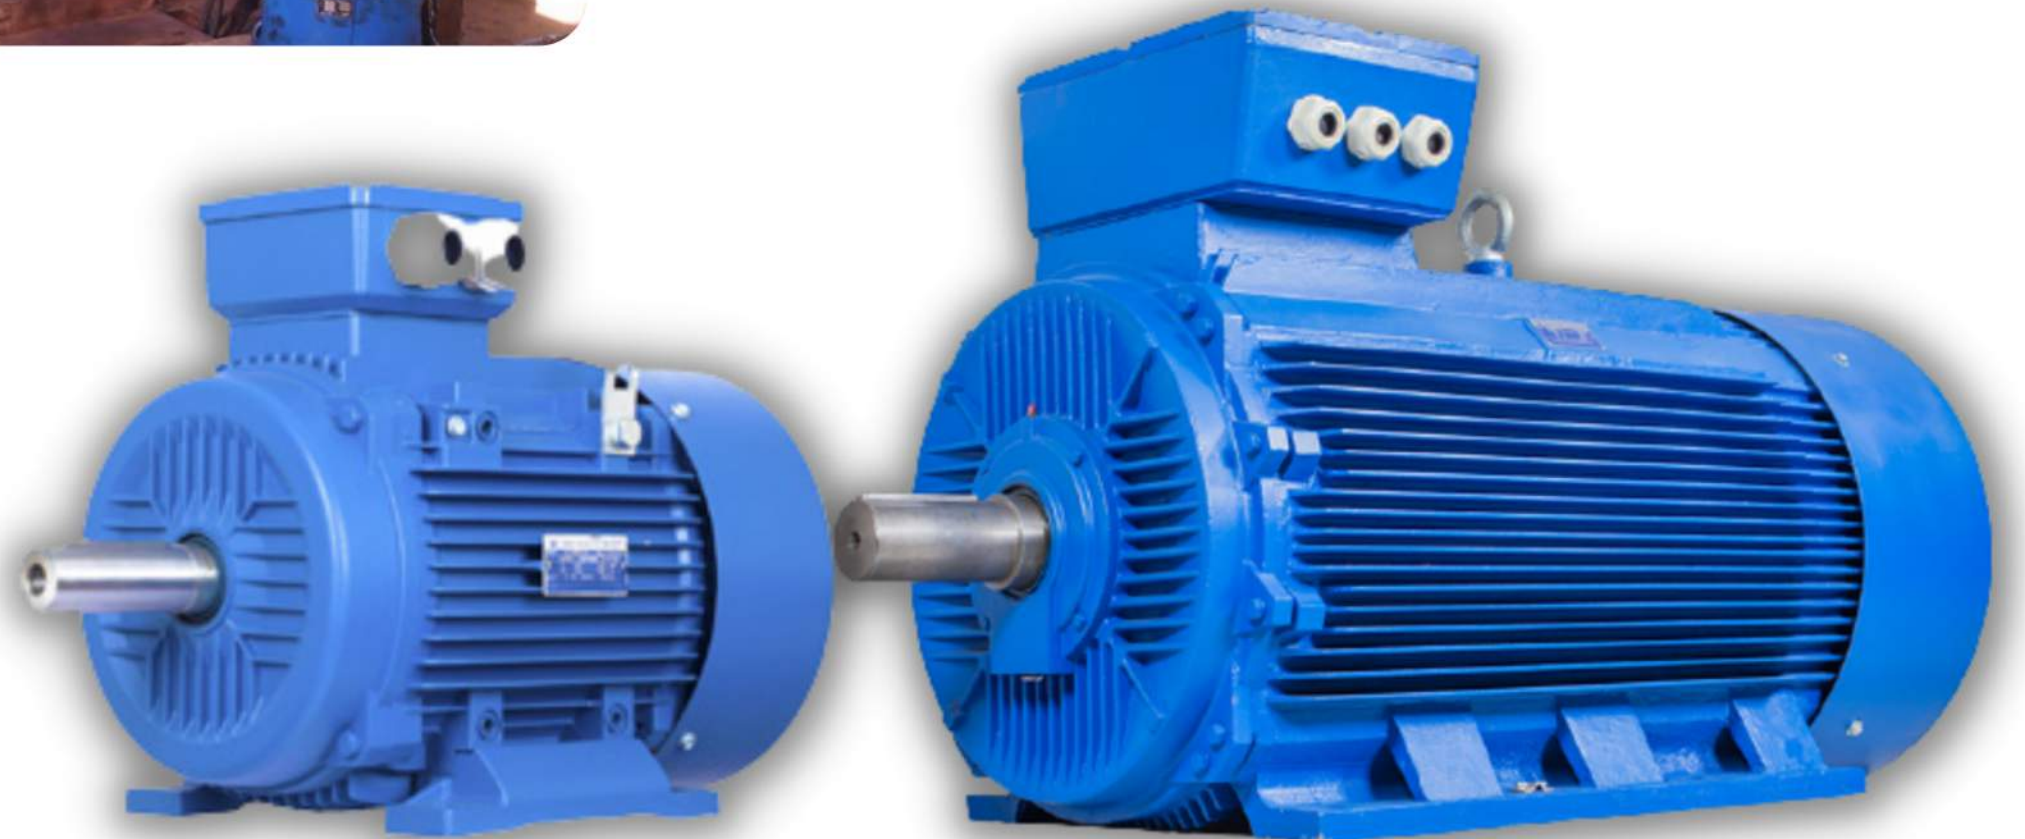

CNP is a brand of pumps which develops, manufactures stainless steel multistage centrifugal pumps. CNP company is always devoted to innovation and management after founded more than many years. The company embarked on the road of a virtuous cycle and operating in scale.

MAGNET MOTORS

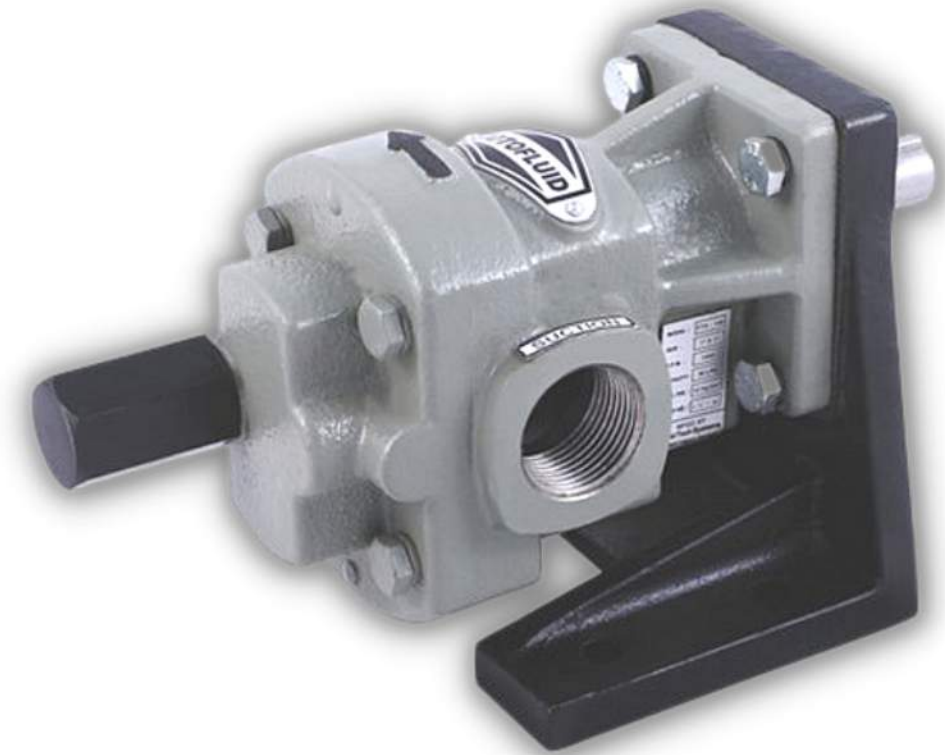

Magnet High Efficiency Motors are widely used in various fields which includes; automotive electrical equipment, national defense, aerospace, industrial and agricultural production sectors and daily life where metal cutting machine tools, industrial fans, pumps, transportation machinery, mixers, agricultural machinery, food machinery, compressors etc. are used.

Rotary Gear Pumps
SINCE : 1993

Rotofluid Fluidtech are pioneers in the industry offering the perfect solution for Viscous, Semi-Viscous Liquid and petroleum product. Such as oil gear pump, lube oil pump, oil pump, oil lubrication pump, gear oil pump and crude oil pump.

BOLTON

Bolton Diesel engines are designed with improved performance for heavy duty processes and combustion efficiency and reliability.

Bolton End suction Centrifugal pumps are capable of delivering fluids up to 3,100GPM.

Bolton Air blowers for sewage system and agricultural industrial applications.

KOOP®

Koop products include six series: single cylinder engines, two-cylinder engines, generators, water pumps, construction machinery, modern agricultural machinery ETC. Koop takes the lead in construction production of two-cylinder air cooled diesel engine and diesel powered water pumps for all dewatering and fluid transfer applications.
